#### **EDUCATION**

#### Stony Brook University – Bachelor of Science in Computer Science

May 2025

- Courses: OOP, Data Structures, Algorithms, Pipelining, Statistics, Scripting, Software Security, Software Development, Software Engineering
- Activities: SBUHacks, Women in Computer Science (WiCS), HopperHacks
- Awards: Dean's List (Fall 2024, Spring 2025)

#### Shoreline Community College – Associate of Science in Computer Science

June 2022

- Awards: Presidents List
- Activities: ESL Lab Assistant & Facilitator, Head of Event Organizer of Indonesian Student Community Shoreline
- Courses: Computer Science I Java, Computer Science II Java, Obj. Oriented Design C++

#### Citra Kasih High School

• **Awards**: Best booth in an entrepreneurship week event, 2nd winner of smartphone photography within the Citra Berkat Foundation, Good conduct award for excellent behavior, Integrity Award

#### **SKILLS**

Languages: Python | Javascrip | C | C++ | Ruby | Ocaml | R | Java | Swift | HTML | React | CSS | SQL

Frameworks: React | Node.js | Express.js | MongoDB | Tailwind CSS | Next.js | Pandas | TensorFlow | HuggingFace

**Developer Tools:** Git | VS Code | Vim | Linux | Snowflake | Jupyter notebooks

## **TECHNICAL EXPERIENCE**

### Memorial Sloan Kettering Cancer Center – Data Science and Analytics Intern

June 2024 - August 2024

- Documented and verified the correctness of Snowflake OTD use cases, leveraging Python and SQL to ensure data accuracy and reliability in analytics workflows.
- Designed and implemented Python-based workflows for data transformation and de-identification, improving data privacy and compliance.
- Collaborated with cross-functional teams to create internal tools and dashboards, enabling non-technical stakeholders to interact with data pipelines.
- Contributed to front-end development for a skin cancer detection app using Figma for prototyping, which won first place in an intern hackathon.

#### **Break Through Tech AI at Cornell Tech – AI Fellow**

May 2023 - June 2024

- Engaged in a 12-month program including Machine Learning coursework by Cornell University, experiential learning experiences, and mentorship from industry professionals.
- Collaborated in a team to deliver projects integrating data visualization and predictive modeling.

#### **Generation Girl** – Teaching Mentor

October 2021 – December 2021

• Co-developed interactive programming resources to teach Swift, fostering computational thinking and problem-solving skills among high school students.

#### LEADERSHIP EXPERIENCE

Permias NYC - Media and Marketing Officer

August 2023 - June 2024

• Proactive team contributor responsible for social media content creation, T-shirt design, and event coordination for the Indonesian Street Food Festival, Homecoming, and other events.

**Indonesian Student Community** - Head of Event Organizer

February 2021 – June 2022

- Orchestrated a variety of events (including annual sports, welcoming week, cultural gatherings, and graduation ceremonies) for the Indonesian Student Community in Shoreline.
- Collaborated effectively with a diverse team of over 30 individuals.
- Successfully fundraised for ISC's largest event, KOPAJA, a nationwide sporting event for Indonesian students across the US, by selling over 350 units of diverse Indonesian dishes.
- Took part in BAJAJ 2022, Seattle's premier food bazaar, dedicated to 10 vendors and attended by a community of more than 2000 Indonesians from around Seattle.

#### **ESL Lab Assistant & Facilitator**

January 2021 - June 2021

- Wrote down the data of students who came and left the lab.
- Hosted the zoom and created breakout rooms for the ESL lab.
- Worked closely with professors as a teacher assistant to help tutor the ESL students in a breakout room.

#### **PROJECTS**

Crypto Price Streamer – TypeScript, Node.js, Next.js, ConnectRPC, Playwright

**Coding Assessment** 

September 2025

- Built a **full-stack web application** that streams real-time cryptocurrency prices from TradingView using **Playwright**.
- Engineered a **scalable server architecture** that supported many concurrent clients, primarily through the efficient reuse and sharing of Playwright resources.

Matcha Bell – Node.js, Discord.js, Axios, Playwright

Personal Project August 2025

- Built a real-time **Discord bot** that monitors restocks from premium matcha vendors and instantly alerts subscribed users, helping them secure rare ceremonial-grade products before sellouts.
- Engineered scheduled **web scraping** pipelines and developed a role-based alert system with interactive Discord UI components (buttons, ephemeral replies) to enhance user control and engagement.

#### **RealEstateGPT** – React, Next.js, Python, Flask

Okada & Company Hackathon

July 2025

- An Al-driven real estate platform featuring multiple specialized conversational agents for property analysis and client consultation.
- Built with **Next.js** frontend and Flask backend, the system delivers real-time insights on nightlife, dining, area quality, pricing, and ROI, with persistent chat sessions and Google authentication.

**Lifetime Financial Planner (LFP)** – JavaScript, React, Node.js, Express, MongoDB, HTML, CSS, Figma SBU: Software Engineering January 2025 - June 2025

- Developed a web-based **Monte Carlo simulation** tool to model lifetime financial plans, incorporating investment strategies, retirement planning, and tax considerations.
- Implemented **probabilistic models** (e.g., **Geometric Brownian Motion**) to analyze financial market behavior and simulate long-term investment outcomes.
- Designed an intuitive **GUI** with interactive visualizations and **customizable charts** to support decision-making for users.
- Enabled flexible asset allocation, financial event modeling (e.g., marriage, home purchase), and tax impact assessment.
- Built features for **scenario comparison**, allowing users to evaluate different retirement ages, investment allocations, and account types.
- Developed a secure, shareable financial planning system, allowing users to save and share plans with family members or advisors.

HopperHacks February 2025

• an Al-powered restaurant recommendation platform that tailors cuisine suggestions based on user preferences and location data.

- Engineered a weighted scoring algorithm to dynamically rank and recommend restaurants based on user input and real-time data such as the location within <10km to detect restaurants nearby.
- Built an interactive web application using **React.js** for the front end and **Node.js/Express** for the back end.

Phreddit – JavaScript, React, Node.js, Express, MongoDB, HTML, CSS

SBU: Software Development

August 2024 - December 2024

- Built a full-stack web application inspired by Reddit using React (front end), Node.js (server), and MongoDB (database), with JavaScript for seamless integration of both client and server.
- Optimized RESTful API endpoints to handle CRUD operations efficiently.
- Integrated bcrypt for secure user authentication and creating a user-friendly interface.

#### **The Enigma Machine** – Python

SBU: Software Security

September 2024

• Created a Python-based simulation of the Enigma Machine, implementing encryption techniques such as rotor settings and plugboard configurations.

Buzz Mania – Javascript, React, Tailwind, HTML/CSS

SBUHacks February 2024

- Developed an interactive clicker game inspired by Cookie Clicker in a team of four, providing players with an engaging and addictive experience for relaxation or entertainment during leisure time.
- Utilized React framework and Tailwind CSS to create a responsive and dynamic user interface, ensuring seamless gameplay.

# From Coffee Machine to Machine Learning – Python, Pandas, NumPy, Matplotlib, TensorFlow Accenture August 2023 - December 2023

Designed a machine learning pipeline using Python libraries (Pandas, NumPy, Matplotlib) to optimize coffee shop

- attributes, such as location and menu items, based on customer preferences.
   Developed 3 Machine Learning models such as Regression, NLP, and Classification models to analyze coffee
- shop attributes (location, menu, marketing) using census data, Yelp reviews, and foot traffic insights.

   Conducted **sentiment analysis** on Yelp reviews to identify key factors influencing customer satisfaction and
- Conducted **sentiment analysis** on Yelp reviews to identify key factors influencing customer satisfaction and specialty menu item preferences.
